PROFESSIONAL SUMMARY

Full Stack (MERN) Developer and B.Sc. Information Technology graduate with hands-on experience building responsive, production-ready web applications across React, Node.js, Express, and MongoDB. Skilled in developing RESTful APIs, secure authentication and authorization, state management, and API integration, with a focus on clean, scalable, and maintainable code. Backed by practical experience in application support, debugging, and SQL data analysis, and driven to deliver reliable, user-focused software.

TECHNICAL SKILLS

Languages: JavaScript, SQL, Python, C/C++, HTML5, CSS3

Frontend: React.js, Redux, Redux Toolkit, Vite, Tailwind CSS, Bootstrap, Material UI, Responsive Design

Backend: Node.js, Express.js, REST API Design, Middleware, Authentication & Authorization (JWT)

Databases: MongoDB, MySQL

Core Concepts: CRUD, MVC, State Management, API Integration, Async Programming, Error Handling, Form Validation, WebSocket, JSON, OOP, Agile

Tools & Deployment: Git, GitHub, Render, Axios, Postman, Hoppscotch, VS Code, Environment Variables

Support & Operations: Application Support, Troubleshooting, Root-Cause Analysis, Log Analysis, Bug Tracking, Software Testing, Technical Documentation

PROFESSIONAL EXPERIENCE

Technical Support Engineer

Jun 2026 – Present

DESS (Dess Digital Meetings)

Mumbai, India

- Provide application support for Dess Digital Meetings, an enterprise board and committee meeting platform, by diagnosing and resolving client-reported functional and technical issues to ensure smooth production operations.
- Investigate and troubleshoot defects across the application stack, analyzing system and server logs to identify root causes and escalating complex issues to the development team with detailed reproduction steps.
- Write and execute SQL queries to validate records, investigate data discrepancies, and support accurate issue resolution within production databases.
- Log, prioritize, and track bugs in issue-tracking tools, and collaborate with developers to verify fixes through structured testing before release.
- Deliver responsive, professional support to enterprise clients and author technical documentation and knowledge-base articles that standardize recurring issue handling and improve team efficiency.

PROJECTS

EduGuard — IoT-Based Smart Classroom Monitoring & Alert System [GitHub](#) • [Live Demo](#)

- Architected and deployed (Render) a full-stack IoT classroom monitoring platform (ESP32, Node.js, Express.js, MongoDB, React, Tailwind CSS) using WebSocket for real-time attendance, gas, and device monitoring.
- Developed Arduino C/C++ firmware integrating PIR, gas, and RTC sensors with a SIM800L GSM module to trigger automated multi-channel alerts (SMS, calls, buzzer, and web).
- Built a secure backend with JWT authentication and authorization, role-based access control, admin two-factor (email OTP), bcrypt password hashing, rate limiting, and input validation.
- Designed a React dashboard with real-time state management for remote device configuration and analytics reports exportable to PDF, Excel, CSV, and JSON.

Wonderlust — Full-Stack Travel Listing Platform

[GitHub](#) • [Live Demo](#)

- Built and deployed (Render) a scalable full-stack travel-listing application with Node.js, Express.js, MongoDB, and Bootstrap, following the MVC architecture for clean, maintainable, and reusable code.
- Integrated interactive map visualizations using Leaflet.js and the OpenStreetMap API to display geolocated property listings, with responsive design across devices.
- Designed and implemented RESTful APIs supporting full CRUD operations for listings and reviews, with server-side validation and image uploads handled through Cloudinary.

EDUCATION

B.Sc. Information Technology, University of Mumbai (S.M. Shetty College) CGPA: 8.60 | 2026

Higher Secondary (XII), Eden School & College 70% | 2023

Secondary (X, CBSE), Nav Krishna Valley School 83% | 2021

CERTIFICATIONS & ACHIEVEMENTS

- **Full Stack Web Development (MERN)** — Apna College
- **Best Project Award** — for EduGuard's hardware–software integration, real-time IoT design, and security.
